***** REMINDER *****

ROAD CLOSURE REMINDER ON TANNER BRIDGE ROAD

Tanner Bridge Road is closed at the Tara Road intersection effective today, October 28th. The original news release was issued on October 11th and this is just a reminder. Don Schnieders Excavating Company, Inc., a local company, was awarded a contract to make improvements to Tanner Bridge Road near the Tara Road intersection as well as realign the intersection. The contractor will have up to 30 days to finish the project and have the road back open. The tentative open date is November 27th.

During the road closure, motorists on Tanner Bridge Road will have to use a signed detour on Route B to Friendship Road. Due to the nature of the work being done, the road must be closed to thru traffic but local residents affected by the project will still be able to access their property. Signing and message boards will help guide motorists through the area during construction.

The Public Works department understands that there will be inconveniences due to this project and we ask that citizens be patient as these needed improvements are being made.
